SUMMARY

Undergraduate student in Artificial Intelligence & Data Science focused on quantitative finance, probability, optimization, and data-driven decision-making. Hands-on experience building systematic trading backtesters, predictive credit-risk models, and LLM/RAG systems using Python, machine learning, and statistical analysis.

PROFESSIONAL EXPERIENCE

Grow Your Skills, *Data Science Intern* 06/2025 – 07/2025

- Built an end-to-end loan approval prediction pipeline using Python and R, covering data cleaning, exploratory analysis, feature engineering, and supervised classification.
- Implemented and benchmarked logistic regression, decision trees, and ensemble methods using Pandas, NumPy, Scikit-learn, and TensorFlow, with hyperparameter tuning through k-fold cross-validation.
- Queried and transformed financial data with SQL and evaluated models using precision, recall, F1, and ROC-AUC.

Emglitz Technologies, *Robotics Intern* 02/2024 – 03/2024

- Contributed to an industrial surveillance project focused on robotics applications.
- Participated in prototype testing, troubleshooting, and technical documentation.Worked on the development and testing of an industrial surveillance prototype.
- Investigated technical approaches for improving industrial monitoring and system reliability.
- Participated in project testing, troubleshooting, and documentation.

EDUCATION

Higher Secondary Certificate (HSC), *Government Model Higher Secondary School* 2021 – 2023
Percentage:78%

B.Tech-Artificial Intelligence & Data Science, 2023 – 2027
V.S.B College of Engineering Technical Campus(Anna University)
CGPA: 8.25/10

SKILLS

Programming Languages: Python, Java, JavaScript | **Data Science & Machine Learning:** Pandas, NumPy, Scikit-learn, TensorFlow, CatBoost, Exploratory Data Analysis | **Backend & Databases:** FastAPI, Django, Node.js, Express.js, MongoDB,SQL | **Tools & Platforms:** Git, GitHub, Streamlit, React, Qiskit

CERTIFICATIONS

Programming in Java-NPTEL | Cloud Computing-NPTEL | Cloud Computing Fundamentals-IBM Skillsbuild | Data Analytics Job Simulation-Deloitte | 6-Week Data Science and Machine Learning Program-IIT Guwahati

ACHIEVEMENTS

Semi-Finalist, Generative AI Track — Convolve 4.0 Pan-IIT AI/ML Hackathon

Finalist — Pathway AI Hackathon, IIT Ropar

Regional Round Qualifier — World Computer Hacker League, ICP & DFINITY

PROJECTS

DocRecon — Production Document Intelligence & Field Extraction

- Engineered an offline document AI pipeline using computer vision, PaddleOCR, and 2D spatial layout analysis to extract structured fields from invoices, tax documents, and financing applications.
- Implemented layered extraction, validation, calibrated confidence scoring, signature/stamp verification, and human-in-the-loop review through FastAPI and Streamlit interfaces.

LLM Performance Optimization-PATHWAY AI

- Implemented dynamic Retrieval-Augmented Generation (RAG) for smart urban management using live IoT sensor data.
- Optimized information retrieval and inference workflows for improved response relevance and lower-latency deployment.

HEFIN — Decentralized AI Chatbot

- Built a decentralized AI chatbot combining on-chain data storage with an LLM-based conversational interface.
- Designed a query-response pipeline to retrieve and reason over decentralized data sources.
